

TEXT AND AUDIO COMMENTS

Text and audio comments can be associated with any swing. The comments are automatically placed onto the Lesson CD when the selected swings are copied onto the CD.

The audio comments use a special triggering sensor so dead air is not recorded. This keeps the comment files smaller.

Any text or audio comment can be saved as a pre-defined comment. These comments can be selected and associated with a swing, thereby eliminating the re-typing or re-recording of the same comments. A pre-defined comment may be a practice drill or a swing critique.

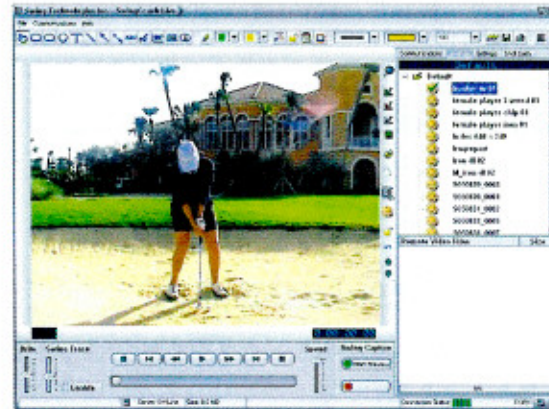

Audio and text comments can be associated with any swing and will automatically be transferred to the Lesson CD.

NEW VERSION 5.0 FEATURES

- ◆ Extended Recording Mode with audio
- ◆ Screen Recording Mode for advanced analysis
- ◆ Picture-in-Picture mode with synced play back

- ◆ E-mail swings or PDF lessons students
- ◆ Supports Picture-in-Picture with synced playback
- ◆ Interactive remote lessons with **SwingCoach Live**
- ◆ Draw Graphics on live video with **SwingWatch Live**
- ◆ Voice or text comments saved with your swings

COMPARISON

The SwingView Pro has full featured swing comparison and overlay capabilities. It automatically synchronizes the swings for playback. The graphic drawing tools and grid can be used on the comparison swings.

The ability to compare student swings to a professional creates an immediate understanding of proper swing position.

SWING FRAME VIEW

The SwingView Pro provides both a 3x3 and 5x4 grid to display individual swing frames. It automatically calculates the optimal frames to display. Manual

Clicking on a frame will magnify the frame for easy viewing. Create PDF and HTML lessons to be e-mailed or uploaded.

STUDENT CD

The pro can easily create a Lesson CD for the student including selected swings with graphic annotations, voice and text comments. The CD is an excellent way to generate extra revenue from your students.

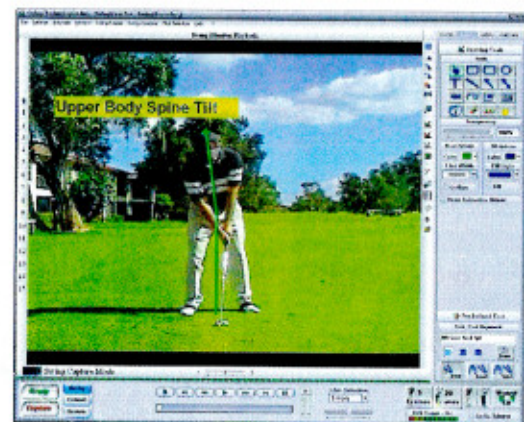

The Lesson CD allows the student to review their lesson by viewing selected swings with graphics, audio comments and text comments. The Lesson CD contains the SwingViewer software that can be run from the CD-ROM or loaded on the student's computer. Student can capture an e-mail video back to the instructor for analysis.

SwingViewer software provides a easy way for the student to review his lessons and compare his progress.

The student can view, print or save as an image file. E-mail the swing frames view.

Use graphic drawing tools to show students where improvements are needed.
